

General information

The hold-down net is used to prevent the MB System pipes from floating when using the MB Liquid Screed System (ESF-55/50).

Application

The system pipes must be fully covered with the hold-down grid. The hold-down grid must be adequately fastened to the system pipes. Remaining pieces of the system pipe or the clip rails are used for this purpose (see illustrations).

Art. no.	Description	Packaging unit
080014-200	Hold-down grid	200 m ² /roll
080014-KL	Hold-down grid	Custom length

Properties	
Material	HDPE
Colour	Green
Weight	32 g/m ²
Mesh size	Approx. 11 mm x 4 mm
Mesh count	330 meshes/dm ²
Dimensions	2 m x 100 m (roll)
Consistency	High chemical resistance, even to solvents up to 60 °C. Not resistant to oxidising agents (nitric acid, oleum, halogens);
Flammability	From 340 °C
